

Watertown Police Department

Watertown, Massachusetts

Evidence & Archival Storage

DATUM[®]
storage solutions

The Client

During their move into a new building, the Watertown Police Department found their current freestanding shelving to be less than adequate in storage capacity for their needs.

To increase their storage potential, they turned to Datum for a solution.

Storage Solution

The answer was three of our MobileTrak® systems that housed 4Post™ shelving. These MobileTraks® were modified to fit in an existing non-Datum track installed in the floor.

The new systems provided plenty of storage space for the police department's evidence and archival records, as well as their current files that were accessed frequently.

With the new MobileTraks®, the Watertown Police Department now had ample capacity with room to grow and improved organization of their materials.
